DATE MAILED: 11/26/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/965,253

Applicant(s)

JOHNSON, JEFFREY

Examiner

Danny Nguyen

Art Unit

2836

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 September 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. §§ 119 and 120

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 11, and 21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 5-7, 9-12, 15-17, 19-22, 25-27, 29, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yue et al. (USPN 6,509,779) in view of Young et al (USPN 5,978,192).

Regarding claims 1, 10, 11, 20, 21, 30, Yue et al. disclose a method and an apparatus (see figures 3 and 4) comprises an inductor (110) having an impedance connected in series between an output of a high frequency circuit (20) operating at a frequency and an ESD circuit (40) configured to protect the high frequency circuit from an ESD event, the impedance having substantially high value at that frequency and a substantially low value at the ESD event). Yue et al do not disclose an ESD clamping circuit as claimed. Young et al disclose an ESD clamping circuit (e.g. see fig. 5) clamps a supply voltage (Vdd) at a predetermined level to provide protection from a voltage surge

when the ESD event occurs (e.g. see col. 8, lines 33-41). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified to the ESD protection circuit of Yue et al to incorporate the ESD clamping circuit as taught by Young et al because Young et al teach that the ESD clamping circuit minimizes its sensitivity to noise and protect an integrated circuit against over-voltage condition and ESD transient (see col. 2, lines 21-29).

Regarding claims 2, 12, 22, Yue et al. disclose the ESD circuit (40) has first and second terminals, the first terminal being connected to one end on the inductor (110), and the second terminal being connected to ground (shown in fig. 3).

Regarding claims 5, 6, 15, 16, 25, 26, Yue et al. disclose the inductor is connected between a first bond pad (10) of the output and a second bond pad (10a) of the ESD circuit (40) on a package substrate in a package encapsulating the high frequency circuit (20) and the ESD circuit (40) (see fig. 13).

Regarding claims 9, 19, 29, Yue et al. disclose the high frequency higher than 1 gigahertz (col. 4, lines 24-25).

Regarding claim 7, 17, 27, Yue et al. disclose the high frequency circuit and ESD circuit are on a silicon die mounted on the package substrate (see abstract).

3. Claims 3, 4, 13, 14, 23, 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yue et al. in view of Young et al, and further in view of Kleveland et al (USPN 5,969,929). Yue et al and Young et al do not disclose the ESD circuit is a gate grounded NMOS and a diode. Kleveland et al. disclose an ESD circuit being a gate grounded NMOS (such as 330 shown in fig. 3B) and an ESD circuit being a diode (116

shown in fig. 1). It would have been obvious to one of ordinary skill in the art to have modified the ESD circuit of Yue et al. and Young et al with a GGNMOS and a diode as taught by Kleveland et al. in order to protect ESD event (col. 5, lines 49-53).

4. Claims 8, 18, 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yue et al in view of Young et al, and further in view of Chiu (USPN 6,414,849). Yue et al. and Young et al do not disclose the package is flip-chip BGA package. Chiu discloses the package is flip-chip BGA package (col. 5, line 35). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the integrated circuit of Yue et al and Young et al to incorporate a flip-chip BGA package as taught by Chiu in order to reduce stress in the IC circuit (Chiu, col. 5, lines 48-51).

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2836

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danny Nguyen whose telephone number is (703)-305-5988. The examiner can normally be reached on Mon to Fri 8:00 AM to 4:30 PM.

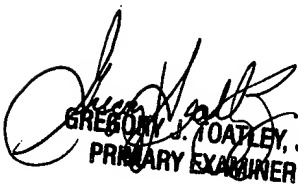

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (703)-308-3119. The fax phone numbers for the organization where this application or proceeding is assigned are (703)-872-9318 for regular communications and (703)-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)-308-0956.
